

Sustainable Compressed Air System

for Manufacturers in Singapore

Equipment Upgrades to Reduce Carbon Emissions

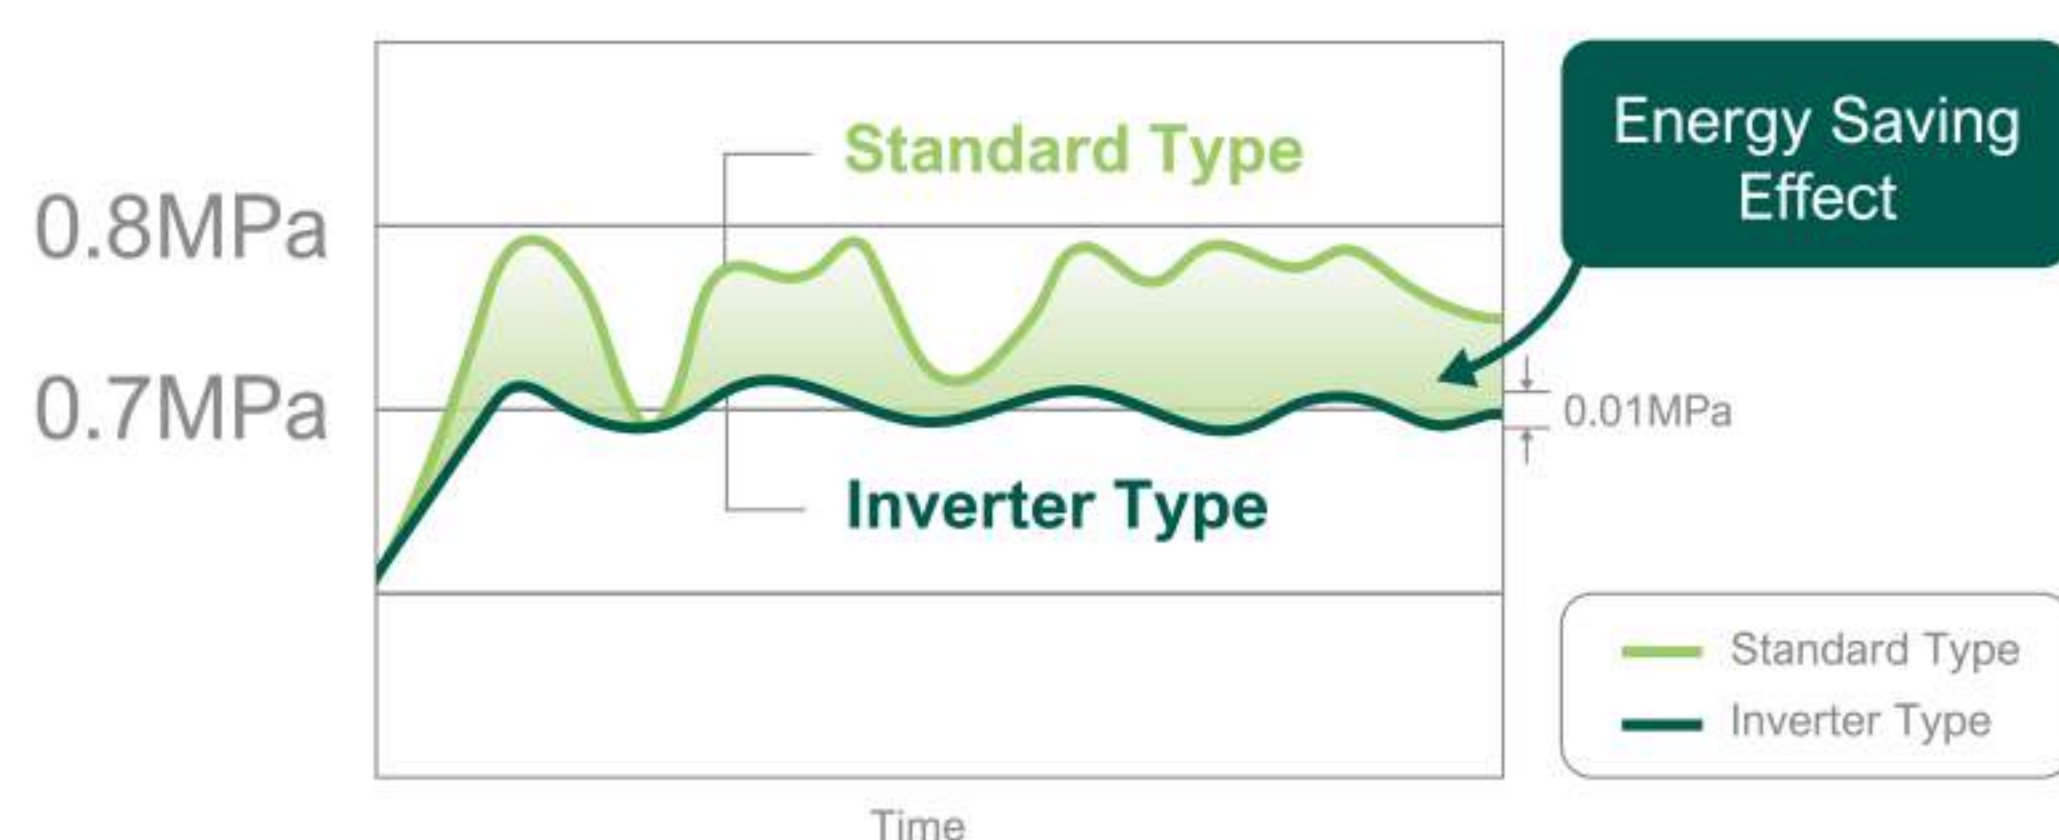

Up to 70% grant support for SME manufacturers in Singapore with:

- i less than S\$500 million annual group revenue;
- ii minimum 30% local shareholding;
- iii at least one local employee;
- iv company classification under SSIC 10 to 32.

Replace existing non-VSD systems with VSD (inverter) systems

Kimair K-PS Series — Single Stage Screw Compressor utilising two technologies to achieve energy savings.

Variable Speed Drive (VSD)

VSD technology allows for a range of frequency conversion from 30% to 100%.

Permanent Magnetic (PM) Motor

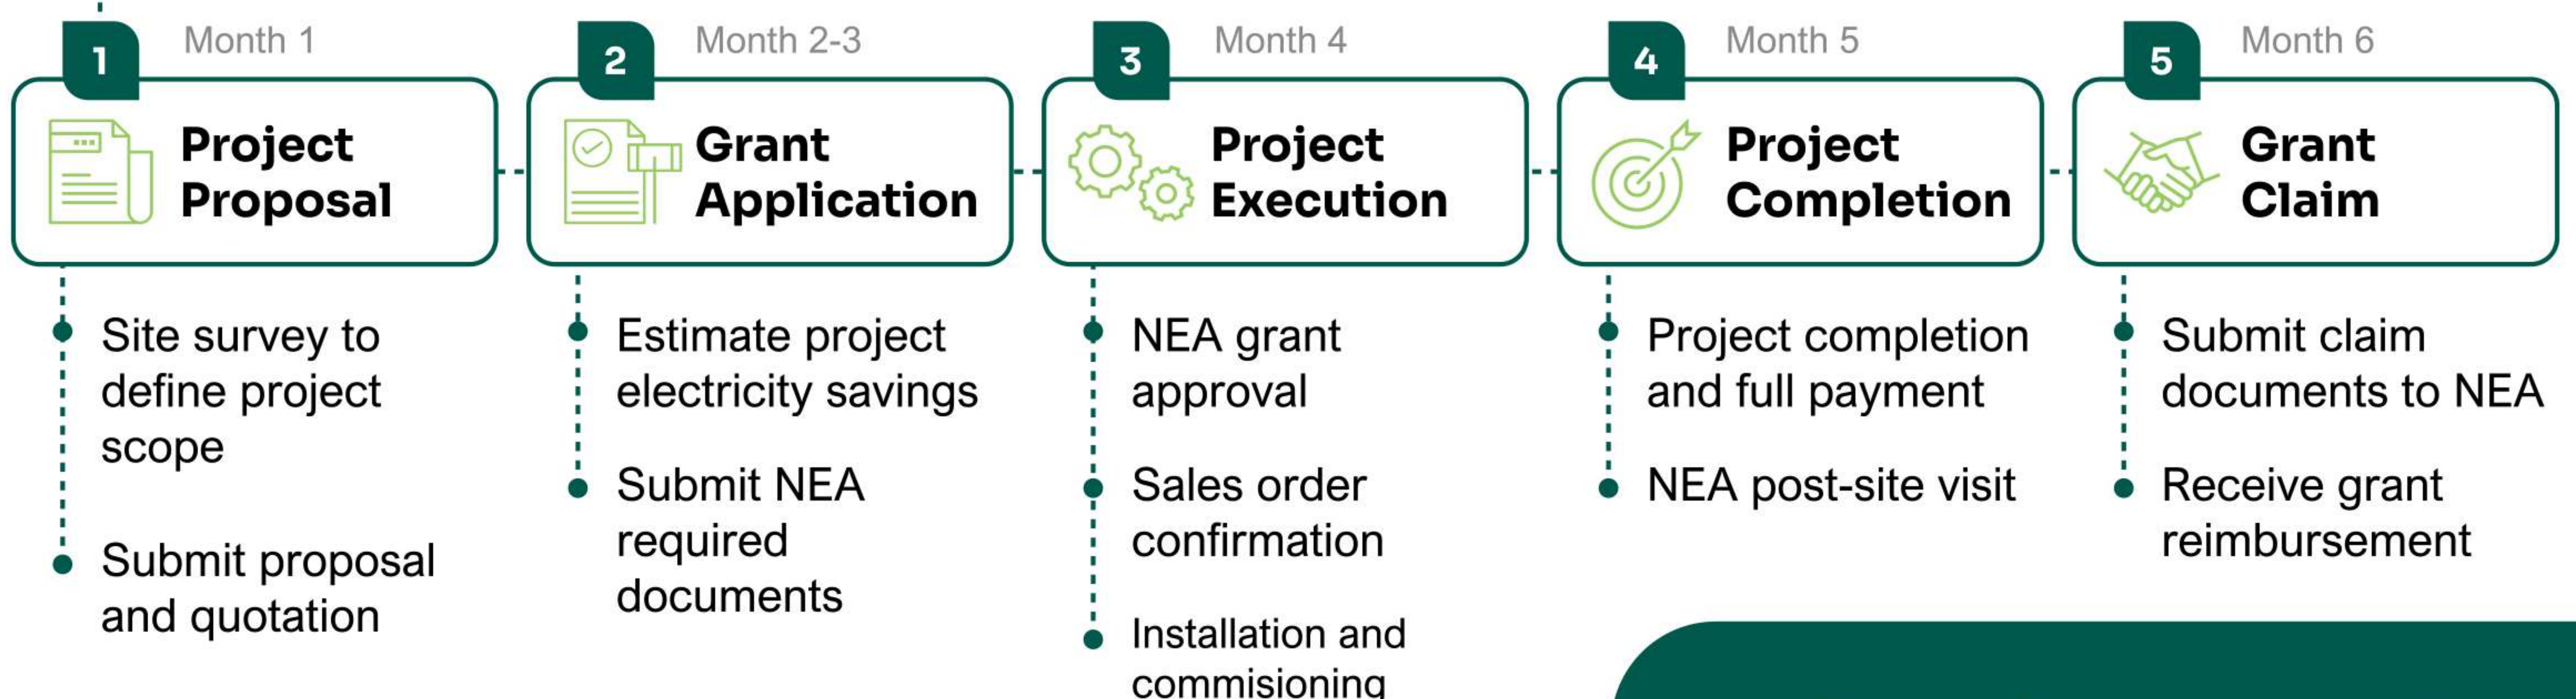

PM Motors have no bearings, resulting in 100% transmission efficiency.

Typical investment range:

S\$20,000 to S\$50,000

5 Steps to Lower Electricity Bills

for pre-approved equipment
under the Energy Efficiency Grant (EEG)
