

Sustainable Compressed Air System

For Manufacturing Companies in Singapore
classified under under SSIC 10 to 32

Equipment Upgrades to Reduce Carbon Emissions

Up to 70% grant support for SME* manufacturers in Singapore with:

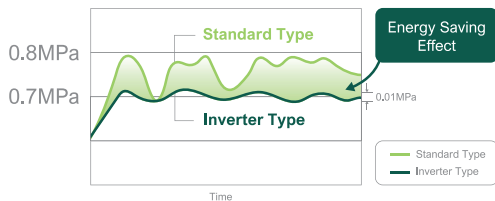

- i minimum 30% local shareholding;
- ii at least one local employee;
- iii less than S\$500 million annual group revenue.

*SMEs refer to companies with group annual sales turnover not exceeding \$100 million OR a group employment size not exceeding 200 employees.

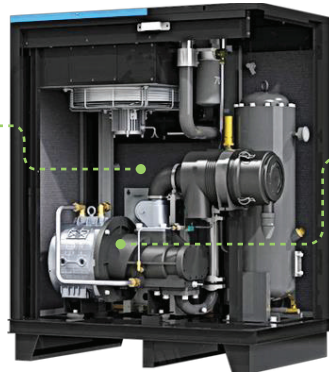

Replace existing non-VSD systems with VSD (inverter) systems

Kimair K-PSM Series — ASME-certified Rotary Screw Compressor utilising two technologies to achieve energy savings.

Variable Speed Drive (VSD)

VSD technology allows for a range of frequency conversion from 30% to 100%.

Permanent Magnetic (PM) Motor

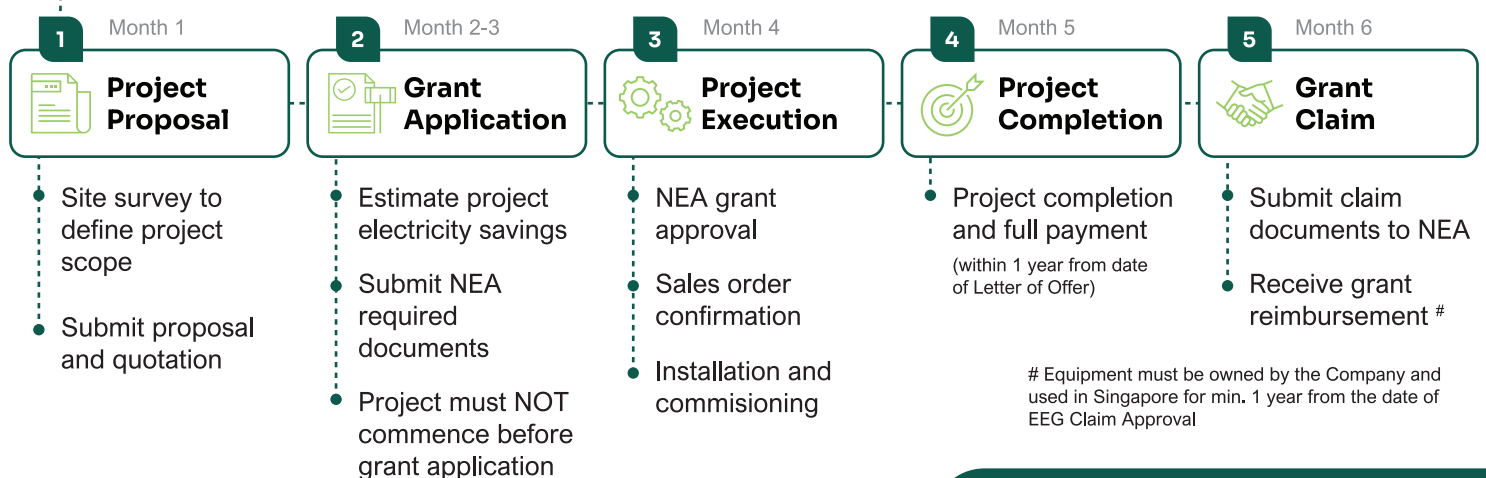

PM Motors have no bearings, resulting in 100% transmission efficiency.

Typical investment range:

S\$20,000 to S\$50,000

5 Steps to Lower Electricity Bills

Equipment must be owned by the Company and used in Singapore for min. 1 year from the date of EEG Claim Approval

Up to
70%
support

**for pre-approved
equipment**

under the Energy Efficiency Grant (EEG)
